"Irwin and Rippe's Intensive Care Medicine" is a comprehensive textbook covering both the theoretical and practical aspects of medical and surgical critical care. The seventh edition is presented as a single volume, and retains the organizational structure established in in the fifth edition--a major overhaul from its two-volume predecessors. Thoroughly updated, this classic reference remains an unsurpassed source of definitive, practical guidance on adult patient care in the ICU.

Irwin & Rippe ' s Manual of Intensive Care Medicine has established itself as an invaluable reference for students, interns, residents, fellows, nurse practitioners and physician assistants, nurses, and respiratory care practitioners working in the critical care medicine environment. Known for its reader-friendly outline format and compact portable size, this handy manual builds upon its tradition of excellence in its Sixth Edition. Available both in print and electronic formats, the Sixth Edition parallels the text, Irwin & Rippe ' s Intensive Care Medicine, Seventh Edition, and features fully updated and revised content with a focus on patient safety.

- Fully revised content addresses recent developments, including the larger role for ultrasound, in critical care medicine.
- Annotated references are provided at the close of each chapter to guide the interested reader through key articles in the relevant literature.
- Video clips have been added where appropriate to reinforce key points and findings.
- Logical organization begins with an extensive section on Procedures and Techniques, followed by 15 sections covering organ system problems as well as palliative care, legal and ethical issues, and transplantation.
- Thorough coverage of pharmacology, poisonings, and overdoses presented in a tabular format.
- New section editors share a wealth of experience and expertise targeted to broaden readers ' skills.

Where To Download Irwin Rippe 7th Edition

This softcover manual covers all procedures and techniques necessary for certification in critical care from the internal medicine, anesthesiology, and surgical critical care certification exam. Each procedure or monitoring technique discusses indications/contraindications, equipment, anatomy, techniques, postprocedure care, and complications. Specific nursing indications are indicated where appropriate.

These three volumes sort out the science behind nightly news reports and magazine cover stories, and help define the interdisciplinary field of lifestyle medicine and health.

Intensive care medicine is a dynamic and evolving specialty, requiring its practitioners to be part physician, physiologist and anaesthetist. This requires a firm foundation of knowledge and an ability to apply this to the clinical situation. This book contains 270 multiple-choice questions allowing self-assessment of the breadth of knowledge required of the modern intensivist. The book is divided into three papers each consisting of 60 multiple true false (MTF) and 30 single best answer (SBA) questions covering areas including resuscitation, diagnosis, disease management, organ support, and ethical and legal aspects of practice. The MTF questions test factual knowledge and understanding of the evidence base underpinning intensive care medicine, while the SBA questions test the ability of the candidate to prioritise, compete options and make the best decision for the patient. Each question is peer reviewed and accompanied by concise and detailed explanatory notes with references to guide further reading. All the authors are practising intensive care physicians with firsthand experience of professional examinations in the specialty. This book will appeal to intensive care physicians approaching professional examinations worldwide, including the European Diploma, American Board and Faculty of Intensive Care Medicine examinations. In addition, it will appeal to intensive care nurses and allied healthcare professionals wishing to update their knowledge as part of continuing professional development, and to physicians sitting professional examinations in related specialties requiring knowledge of intensive care medicine such as general medicine, general surgery and anaesthesia. This new book will complement the existing international best-selling title ' Multiple Choice Questions in Intensive Care Medicine ' (ISBN 978 1 903378 64 9), also written by Dr Steve Benington.

Irwin & Ripp's Manual of Intensive Care Medicine has established itself as an invaluable reference for students, interns, residents, fellows, nurse practitioners and physician assistants, nurses and respiratory care practitioners working in the critical care medicine environment. Known for its reader-friendly outline format and compact portable size, this handy manual builds upon its tradition of excellence in its sixth edition. € Available both in print and electronic formats, the sixth edition parallels the text, Irwin & Rippe's Intensive Care Medicine, seventh edition, and features fully updated and revised content with a focus on patient safety. INCLUDES: - Fully revised content addresses recent developments, including the larger role for ultrasound, in critical care medicine - Annotated references are provided at the close of each chapter to guide the interested reader through key articles in the relevant literature - Video clips have been added where appropriate to reinforce key points and findings - Logical organization begins with an extensive section on Procedures and Techniques, followed by 15 sections covering organ system problems as well as palliative care, legal and ethical issues, and transplantation - Thorough coverage of pharmacology, poisonings and overdoses presented in a tabular format - New section editors share a wealth of experience and expertise targeted to broaden readers' skills.

The fully revised, third edition of this bestselling Handbook describes best practice of critical care in a succinct, concise and clinically-orientated way. Covering the principles of general management, it includes therapeutic and monitoring devices, specific disorders of organ systems, as well as detailed information on drugs and fluids. New material has been added on key areas such as airway maintenance, dressing techniques, infection control, echocardiography, tissue perfusion monitoring, coma and more. With up-to-date references and invaluable clinical advice, there is also plenty of space to add notes or amend sections to suit local protocols. Patient-centred and practical, it will serve the consultant, trainee, nurse or other allied health professionals as both a reference and aide memoir. This is the indispensable Oxford Handbook for all those working within critical care.
