The Churn is the best back story of them all. All the hints, and questions raised about Amos' dubious origins, unique skills, and precarious mental health are summed up nicely in this riveting little book. It also lays the groundwork for events in book five. Seriously, you can't leave this one out or you'll miss the best part!

The Churn is an additional book to the Expanse series, set before the series' beginnings and chronicling some events in the life of one of my favorite characters, Amos Burton. Amos, or Jimmy, is a low level thug with a lot of issues and a broken moral compass. And that is what makes him so compelling.

Much of human history has played itself out along the rim of the Indian Ocean. In a first-of-its-kind attempt, bestselling author Sanjeev Sanyal tells the history of this significant region, which stretches across East Africa, the Middle East and the Indian subcontinent to South East Asia and Australia. He narrates a fascinating tale about the earliest human migrations out of Africa and the great cities of Angkor and Vijayanagar; medieval Arab empires and Chinese " treasure fleets " ; the rivalries of European colonial powers and a new dawn. Sanjeev explores remote archaeological sites, ancient inscriptions, maritime trading networks and half-forgotten oral histories, to make exciting revelations. In his inimitable style, he draws upon existing and new evidence to challenge well-established claims about famous historical characters and the flow of history. Adventurers, merchants, explorers, monks, swashbuckling pirates, revolutionaries and warrior princesses populate this colourful and multifaceted narrative. The Ocean of Churn takes the reader on an amazing journey through medieval geopolitics and eyewitness accounts of long-lost cities to the latest genetic discoveries about human origins, bringing alive a region that has defined civilization from the very beginning.

Most change efforts fail because most change methods are built to deal with single challenges in a nice, neat, linear way. But leaders know that today, pressures for change don't come at you one at a time; they come all at once. It's like riding a roller coaster: sudden drops, jarring turns, anxious climbs into the unknown. Drawing on his years of experience at the Center for Creative Leadership and Columbia University, Bill Pasmore offers a four-part model and four mindsets that allow leaders to deal with multiple changes simultaneously without drowning in the churn. The first step, Pasmore says, is to Discover which external pressures for change are the most necessary to address. The key here is to think fewer—step away from the buffet of possibilities and pinpoint the highest-impact options. Then you need to Decide how many change efforts your organization can handle. Here the mindset is to think scarcer—you have only so many people and so many resources, so how do you best use them? Once you've figured that out, it's time to Do—and here you want to think faster. Streamline processes and engage in rapid prototyping so you can learn quickly and cost-effectively. The last step is to Discern what worked and what didn't, so think smarter—develop metrics, identify trends, and make sure learnings are disseminated throughout the organization. For each stage of the process, Pasmore offers detailed advice, practical tools, and real-world examples. This book is a comprehensive guide to navigating change the way it happens now.
