This book uniquely applies securitization theory to the mass sexual violence atrocities committed during the Bosnia war and the Rwandan genocide. Examining the inherent links between rape, war and global security, Hirschauer analyses the complexities of conflict related sexual violence.

This book seeks to interrogate how contemporary policy issues become 'securitized' and, furthermore, what the implications of this process are. A generation after the introduction of the concept of securitization to the security studies field, this book engages with how securitization and desecuritization 'works' within and across a wide range of security domains including terrorism and counter-terrorism, climate change, sexual and gender-based violence, inter-state and intra-state conflict, identity, and memory in various geographic and social contexts. Blending theory and application, the contributors to this volume - drawn from different disciplinary, ontological, and geographic 'spaces' - orient their investigations around three common analytical objectives: revealing deficiencies in and through application(s) of securitization; considering securitization through speech-acts and discourse as well as other mechanisms; and exposing latent orthodoxies embedded in securitization research. The volume demonstrates the dynamic and elastic quality of securitization and desecuritization as concepts that bear explanatory fruit when applied across a wide range of security issues, actors, and audiences. It also reveals the deficiencies in restricting securitization research to an overly narrow set of issues, actors, and mechanisms. This volume will be of great interest to scholars of critical security studies, international security, and International Relations. Chapter 6 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license <https://www.routledge.com/Securitization-Revisited-Contemporary-Applications-and-Insights/Butler/p/book/9780367150372>

Reports of sexual violence in armed conflict frequently appear in political discussions and news media, presenting a stark contrast to a long history of silence and nonrecognition. Conflict-related sexual violence has transitioned rapidly from a neglected human rights issue to an unambiguous security concern on the agendas of powerful states and the United Nations Security Council. Through interviews and primary-source evidence, Kerry F. Crawford investigates the reasons for this dramatic change and the implications of the securitization of sexual violence. Views about wartime sexual violence began changing in the 1990s as a result of the conflicts in the former Yugoslavia and Rwanda and then accelerated in the 2000s. Three case studies—the United States' response to sexual violence in the Democratic Republic of Congo, the adoption of UN Security Council Resolution 1820 in 2008, and the development of the United Kingdom's Preventing Sexual Violence in Conflict Initiative—illustrate that use of the weapon of war frame does not represent pure co-optation by the security sector. Rather, well-placed advocates have used this frame to advance the antisexual violence agenda while simultaneously working to move beyond the frame's constraints. This book is a groundbreaking account of the transformation of international efforts to end wartime sexual violence.

This book provides an in-depth analysis of how mobilization and legitimation for war are made possible, with a focus on Russia's conflict with Chechnya. Through which processes do leaders and their publics come to define and accept certain conflicts as difficult to engage in, and others as logical, even necessary? Drawing on a detailed study of changes in Russia's approach to Chechnya, this book argues that 're-phrasing' Chechnya as a terrorist threat in 1999 was essential to making the use of violence acceptable to the Russian public. The book refutes popular explanations that see Russian war-making as

determined and grounded in a sole, authoritarian leader. Close study of the statements and texts of Duma representatives, experts and journalists before and during the war demonstrates how the Second Chechen War was made a 'legitimate' undertaking through the efforts of many. A post-structuralist reinterpretation of securitization theory guides and structures the book, with discourse theory and method employed as a means to uncover the social processes that make war acceptable. More generally, the book provides a framework for understanding the broad social processes that underpin legitimized war-making. This book will be of much interest to students of Russian politics, critical terrorism studies, security studies and international relations.

The eleven-year civil war in Sierra Leone from 1991 to 2002 was incomprehensibly brutal—it is estimated that half of all female refugees were raped and many thousands were killed. While the publicity surrounding sexual violence helped to create a general picture of women and girls as victims of the conflict, there has been little effort to understand female soldiers' involvement in, and experience of, the conflict. *Female Soldiers in Sierra Leone* draws on interviews with 75 former female soldiers and over 20 local experts, providing a rare perspective on both the civil war and post-conflict development efforts in the country. Megan MacKenzie argues that post-conflict reconstruction is a highly gendered process, demonstrating that a clear recognition and understanding of the roles and experiences of female soldiers are central to both understanding the conflict and to crafting effective policy for the future.

This volume aims to provide a new framework for the analysis of securitization processes, increasing our understanding of how security issues emerge, evolve and dissolve. Securitisation theory has become one of the key components of security studies and IR courses in recent years, and this book represents the first attempt to provide an integrated and rigorous overview of securitization practices within a coherent framework. To do so, it organizes securitization around three core assumptions which make the theory applicable to empirical studies: the centrality of audience, the co-dependency of agency and context and the structuring force of the dispositive. These assumptions are then investigated through discourse analysis, process-tracing, ethnographic research, and content analysis and discussed in relation to extensive case studies. This innovative new book will be of much interest to students of securitisation and critical security studies, as well as IR theory and sociology. Thierry Balzacq is holder of the Tocqueville Chair on Security Policies and Professor at the University of Namur. He is Research Director at the University of Louvain and Associate Researcher at the Centre for European Studies at Sciences Po Paris.

Security Studies: An Introduction, 3rd edition, is the most comprehensive textbook available on the subject, providing students with an essential grounding in the debates, frameworks, and issues on the contemporary security agenda. This new edition has been comprehensively revised and updated, with new chapters added on poststructuralism, postcolonialism, securitization, peace and violence, development, women, peace and security, cybersecurity, and outer space. Divided into four parts, the text provides students with a detailed, accessible overview of the major theoretical approaches, key themes, and most significant issues within security studies. Part 1 explores the main theoretical approaches from both traditional and critical standpoints Part 2 explains the central concepts underpinning contemporary debates Part 3 presents an overview of the institutional security architecture Part 4 examines some of the key contemporary challenges to global security Collecting these related strands into a single textbook creates a valuable teaching tool and a comprehensive, accessible learning resource for undergraduates and MA students.

This book examines the relationship between women, gender and the international security agenda, exploring the meaning of security in terms of discourse and practice, as well as the larger goals and strategies of the global women's movement. Today, many complex global problems are being located within the security logic. From the environment to HIV/AIDS, state and non-state actors have made a practice out of securitizing issues that are not conventionally seen as such. As most prominently demonstrated by the UN Security Council Resolution 1325 (2001), activists for women's rights have increasingly framed women's rights and gender inequality as security issues in an attempt to gain access to the international security agenda, particularly in the context of the United Nations. This book explores the nature and implications of the use of security language as a political framework for women, tracing and analyzing the organizational dynamics of women's activism in the United Nations system and how women have come to embrace and been impacted by the security framework, globally and locally. The book argues that, from a feminist and human security perspective, efforts to engender the security discourse have had both a broadening and limiting effect, highlighting reasons to be sceptical of securitization as an inherently beneficial strategy. Four cases studies are used to develop the core themes: (1) the campaign to implement UN Security Council Resolution 1325; (2) the strategies utilized by those advocating women's issues in the security arena compared to those advocating for children; (3) the organizational development of the UN Development Fund for Women and how it has come to securitize women; and (4) the activity of the UN Peacebuilding Commission and its challenges in gendering its security approach. The work will be of interest to students of critical security, gender studies, international organizations and international relations in general. Natalie Florea Hudson received her PhD in Political Science from the University of Connecticut and is an Assistant Professor at the University of Dayton. She specializes in gender and international relations, human rights, international security studies, and international law and organization.

This book defines the relationship between gender and international security, analyzing and critiquing international security theory and practice from a gendered perspective. Gender issues have an important place in the international security landscape, but have been neglected both in the theory and practice

of international security. The passage and implementation of UN Security Council Resolution 1325 (on Security Council operations), the integration of gender concerns into peacekeeping, the management of refugees, post-conflict disarmament and reintegration and protection for non-combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security. This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally, in order to demonstrate the importance of gender analysis to the study of international security, and to expand the feminist research program in Security Studies. The chapters included in this book not only challenge the assumed irrelevance of gender, they argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue. Rather, the contributors argue that gender is conceptually, empirically, and normatively essential to studying international security. They do so by critiquing and reconstructing key concepts of and theories in international security, by looking for the increasingly complex roles women play as security actors, and by looking at various contemporary security issues through gendered lenses. Together, these chapters make the case that accurate, rigorous, and ethical scholarship of international security cannot be produced without taking account of women's presence in or the gendering of world politics. This book will be of interest to all students of critical security studies, gender studies and International Relations in general. Laura Sjoberg is Assistant Professor of Political Science at the University of Florida. She has a Phd in International Relations and Gender Studies from the University of Southern California and is the author of *Gender, Justice, and the Wars in Iraq* (2006) and, with Caron Gentry, *Mothers, Monsters, Whores: Women's Violence in Global Politics* (2007)

What should be done about trafficking in women? Aradau shows that the problematization of trafficking as a security issue limits what can be done. Exploring the complex relationship between security, politics and subjectivity, this book suggests new forms of action which transcend security practices.
